

WATER SOLUTIONS

Water Recycling & Disposal Well Development

Innovative Eco-friendly Solutions for Water in the Oil & Gas Industry

The Produced Water group is committed to offering safe, cost effective and sustainable solutions for the ever changing water environment. Our team brings extensive water and wastewater treatment experience as well as cutting edge technology to solve your water issues. We are focused on staying ahead of the quickly changing legal and regulatory environment to offer services from disposal to recycling of water in the field.

Our team offers customized services based on your water needs with a focus on limiting hauling requirements and minimizing water purchases. We are engaged in research and development to further enhance the services that we provide with a focus on sustainability. Let us show you how we can improve your bottom line while doing the right thing for the environment.

- › Mobile Recycling Units: On-site treatment of produced water in a closed-loop process
- › Collection and disposal of flowback water
- › Piping and trucking of produced water
- › Sustainable and cost effective

WHO WE ARE

ERIC GOPSILL, P.E.

eric.gopsill@cws.concordenergy.com | 303.468.1923

Eric is an experienced senior manager with specialized expertise in treatment plants and heavy civil projects. He brings a complete range of construction management skills to successfully deliver projects on time and on budget. Eric's expertise as a senior program manager includes estimating and management of water, wastewater, and structures projects that have been delivered by many differing contract models from hard bid to design build.

DAVID BOWER

david.bower@cws.concordenergy.com | 303.868.7362

David has over 20 years of experience in developing and promoting, and managing low energy, carbon neutral, and environmentally friendly and sustainable products and services. His expertise includes everything from inception to completion and contracting, including the design, build, and development of the best applicable practices and equipment.

SAM RASURE

sam.rasure@cws.concordenergy.com | 303.468.1262

Sam is a 15 year veteran of the energy industry. He began his career at Duke Energy where he marketed all of the natural gas production from Duke's DJ basin fractionation plants. Following his time at Duke, Sam moved to Enserco Energy, where he began as a manager of their producer services group. Sam's in-depth knowledge of the energy infrastructure in the Rockies, as well as his willingness to work with producers and understand their needs, is what he brings to the services business today.
